Report details	This is the first report i got.
First	This is the first report i got.
It has various sections that can be accessed from different parent forms	The System stores and manages both the security staff and the clients
For example the staff table can be accessed by pressing on the staff button on the home page	The System stores and manages both the security staff and the clients
The Clients field can be accessed by pressing the cients button on the home page	More improvements are to come
Thank you	More improvements are to come
